

# Sounding board through listening to a student's opinions, concerns and thoughts on their school experience

"The teachers in the subject department in general acted as a sounding board. I was able to share my ideas and experience and ask questions, and they were always there to listen and give advice" (BEd 3 Student)

"She (the teacher) allowed time in her busy schedule for me to talk about the ideas which I had and then for her to listen and give me feedback" (BEd 4 Student)
